Background and Investment Objective

AXA Investment Managers Paris ("AXA IM") has been the Investment Manager of Volta Finance Limited ("Volta") since inception. Volta's investment objectives are to preserve capital across the credit cycle and to provide a stable stream of income to its Shareholders through dividends. For this purpose, Volta pursues a multi-asset investment strategy on deals, vehicles and arrangements that provide leveraged exposure to target Underlying Assets (including corporate credit, residential and commercial mortgages, auto and student loans, credit card and lease receivables).

Volta Finance Ltd

Monthly Report - April 2025

Monthly Commentary

Volta Finance's net performance for the month of April was negative -2.4%, taking the Aug 2024-to-date performance to +7.1%. Both our investments in CLO Debt and CLO Equity have experienced volatility post-liberation day, reflected in the valuation of the underlying assets of the fund.

April was dominated by highly volatile markets driven by a confluence of macroeconomic and geopolitical events. On April 2, 2025, President Trump announced aggressive tariff policies aimed at addressing trade imbalances and bolstering U.S. economic sovereignty. Key measures included a 10% baseline tariff on all countries, with higher reciprocal tariffs on countries with significant trade deficits. These tariffs prompted swift responses from trading partners, notably escalating tensions with China, leading the U.S. to further increase tariffs on Chinese products to 145%.

These announcements triggered immediate market reactions, causing U.S. and European stock indices to experience sharp declines amid fears of disrupted supply chains and higher costs. Markets partially recovered by month's end as the Trump administration declared a 90-day tariffs pause on all countries that did not retaliate. From a macroeconomic perspective, sentiment was mixed. The April U.S. jobs report indicated resilience, with 177,000 jobs added—surpassing expectations—and the unemployment rate holding steady at 4.2%. However, GDP data painted a less optimistic picture, with a -0.3% annualized contraction in Q1 2025, sharply down from the previous quarter's 2.4% growth. Increased imports and reduced government spending drove this decline, prompting the IMF to revise recession risks upward from 25% to 40%, while the Federal Reserve lowered its 2025 GDP growth forecast to 1.7%. In Europe, the ECB cut interest rates by 25 basis points to 2.25% amid weakening growth prospects and tariff-related uncertainties, also revising the bloc's 2025 growth forecast down to 0.9% from 1.1%.

Market-wise, the European High Yield index (Xover) closed around 40bps wider while Euro Loans lost 1pt at 97.80px (Morningstar European Leveraged Loan Index). US Loans were down as well (-85cts) at 96.30px. Primary CLO markets remained busy as many transactions had secured orders, while levels moved wider across the capital structure, notably with BBs north of +600bps and single-Bs above +900bps. In terms of performance, CLO BB tranches total returns reached -1.5%. This is to be put in perspective with US High Yield returning -1.07% in the same period and Euro High Yield -1%.

In terms of defaults, Liability Management Exercises (aka 'LME') are now the norm in the US market. Default rate in the US is standing at c.4.3% (0.8% excluding LME) according to Morningstar LL Index while the default rate in Europe is kept at 0.3% at the end of March in terms of principal amount. This is resulting into some par erosion and some pressure on CCC headroom for amortizing CLO.

In front of these uncertainties, we decided to increase our cash up to c.16% of NAV at the end of the month through active management in addition to strong CLO Equity distributions: we received €7.5m coming from called CLO Equities, sold European CLO single B and redeemed US CLO debt. At the opposite, we invested into our US and European CLO warehouses €1.9m to buy loans at a discount and €2.3m into CLO debt tranches. In addition, Volta Finance's cashflow generation remained stable at €28.5m equivalent of interests and coupons over the last six months, representing close to 22% of April's NAV on an annualized basis.

Over the month, Volta's CLO Equity tranches returned -3.6%** while CLO Debt tranches returned -0.9% performance**. This performance is consistent – although better – with the total returns of the product as mentioned above, especially when considering that Volta Finance is exposed to both BB and single-B tranches.

Through the month, the dollar volatility had again a meaningful impact on the overall funds' performance (-0.64%). In the second half of the month, considering the potential change into the long-term investor view on the dollar, we decided to lower our exposure to USD to avoid further weakening and decreased our exposure to c.13%.

As of end of April 2025, Volta's NAV was €262.9m, i.e. €7.19 per share.

**It should be noted that approximately 4.24% of Volta's GAV comprises investments for which the relevant NAVs as at the month-end date are normally available only after Volta's NAV has already been published. Volta's policy is to publish its NAV on as timely a basis as possible to provide shareholders with Volta's appropriately up-to-date NAV information. Consequently, such investments are valued using the most recently available NAV for each fund or quoted price for such subordinated notes. The most recently available fund NAV or quoted price was 4.24% as at 31 March 2025.*

*** "performances" of asset classes are calculated as the Dietz-performance of the assets in each bucket, taking into account the Mark-to-Market of the assets at period ends, payments received from the assets over the period, and ignoring changes in cross-currency rates. Nevertheless, some residual currency effects could impact the aggregate value of the portfolio when aggregating each bucket.*

Monthly Report - April 2025

Important Information

This monthly report is published by AXA Investment Managers Paris ("AXA IM"), in its capacity as alternative investment fund manager (within the meaning of Directive 2011/61/EU, the "AIFM Directive") of Volta Finance Limited (the «Company») whose portfolio is managed by AXA IM. This monthly report is intended only for the person to whom it has been delivered. By obtaining access to and reviewing this monthly report, you acknowledge and agree to be bound by the following: No part of this document may be reproduced in any manner without the prior written permission of AXA IM. This monthly report does not constitute or form part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any shares or other securities of the Company whose portfolio is managed by AXA IM, or securities of any other entity (together, the "Securities"). The Securities described in this monthly report may not be eligible for sale in some states or countries and may not be suitable for all types of investors. Prospective investors are advised to seek expert legal, financial, tax and other professional advice before making any investment decision. Securities in the Company may not be offered or sold directly or indirectly into the United States or to U.S. Persons. Nor shall this monthly report or any part of it nor the fact of its distribution or publication (on the Company's website or otherwise) form the basis of, or be relied on in connection with, any contract or investment decision in relation to the Securities. This monthly report does not constitute a recommendation to buy, sell or hold the Securities. The information contained herein is for information purposes only, does not purport to contain all the information that may be required to evaluate the Company or any other entity or their respective financial positions. This monthly report speaks only as of its date and neither AXA IM nor the Company is under any obligation to update the information contained herein. Certain information and estimates contained herein are originated by or derived from third parties and the accuracy and completeness of such information and estimates has not been verified. It should also be noted that the financial information contained herein has not been audited. No representation or warranty whatsoever, whether express or implied, is given by or on behalf of AXA IM, the Company, their affiliates, or their respective directors, officers or employees or any other person as to (a) the accuracy or completeness of the information or (b) the opinions contained in this monthly report. None of AXA IM, the Company, any of their affiliates, or their respective directors, officers or employees or any other person accepts any liability whatsoever for any such information or opinions. Nothing contained herein shall be relied upon as a promise or representation whether as to past or future performance of the Company, any other entity, any Securities or any asset class in the Company's portfolio. The figures provided that relate to past months or years and past performance cannot be relied on as a guide to future performance or construed as a reliable indicator as to future performance. Throughout this review, the citation of specific trades or strategies is intended to illustrate some of the investment methodologies and philosophies of the Company, as implemented by AXA IM. The historical success or AXA IM's belief in the future success, of any of these trades or strategies is not indicative of, and has no bearing on, future results. No statement in this monthly report is intended to be nor may be construed as a profit forecast and there can be no assurance that the assumptions described herein, the returns and targets (including without limitation target portfolio composition) indicated herein will be achieved. The views and opinions expressed herein include forward-looking statements which may or may not be accurate. Forward-looking statements can be identified by words like "believe", "expect", "anticipate", or similar expressions. You should not place undue reliance on forward-looking statements, which are current as of the date of this report. AXA IM disclaims any obligation to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise. The valuation of financial assets can vary significantly from the prices that the AXA IM could obtain if it sought to liquidate the positions on behalf of the Company due to market conditions and general economic environment. Such valuations do not constitute a fairness or similar opinion and should not be regarded as such. They follow the valuation policy of the Company as adapted from time to time in the best interests of the shareholders, taking into account the conditions of financial markets at that time. Volta qualifies as an alternative investment fund within the meaning of the AIFM Directive and is notified as such under the license held by AXA IM with the Autorité des Marchés Financiers (the "AMF") in France.
