Anti-Scour Solutions

MARINE CIVILS

"Innovative, proven and bespoke solutions"

ANTI-SCOUR SOLUTIONS

Pipeshield design, manufacture & supply anti-scour solutions to areas exposed to erosion and risk of impact. We provide solutions for many applications including ports, harbours, marinas, outfalls, inland waterways, quaysides, revetments, riverbanks, foundations & estuaries.

TECHNICAL SUPPORT

Pipeshield International Limited manufacture and supply a number of different engineered products to provide complete scour protection to areas vulnerable to erosion through naturally created velocities such as tidal forces to generated erosion caused by vessel propellers, bow thrusters and dropped objects.

Our experts in scour protection and remediation can engineer solutions to complement your design engineer's proposals or alternatively our technical department can provide complete technical services to develop bespoke solutions for your project.

Globally recognised as experts in the field of subsurface asset protection, we can provide long term and short term solutions to protect multiple aspects of your project.

Our portfolio provides many different solutions for different scenarios, and is made up of a wide range of different materials including reinforced and non-reinforced concrete, geotextiles & rubbers, marine grade netting and fabric formworks.

It is not just our products that are flexible. If we can't supply it cost effectively from one of our permanent global manufacturing facilities, we can mobilise equipment and personnel to a location within close proximity of the project and manufacture your solutions there.

Specialist handling & installation equipment for cost saving optimisation

Pipeshield have a network of global partners including Europe, the Middle East and Asia Pacific

COMPLETE SOLUTIONS - MULTIPLE OPTIONS

Our experts can provide comprehensive solutions or support your existing projects depending on your needs.

Our wide range of products ensure all options are covered and our high quality products are designed with installation in mind, to ensure cost effective, long terms solutions.

Our range of products include the patented Nose to Notch (N2 Edge) block profile for unrivalled stability

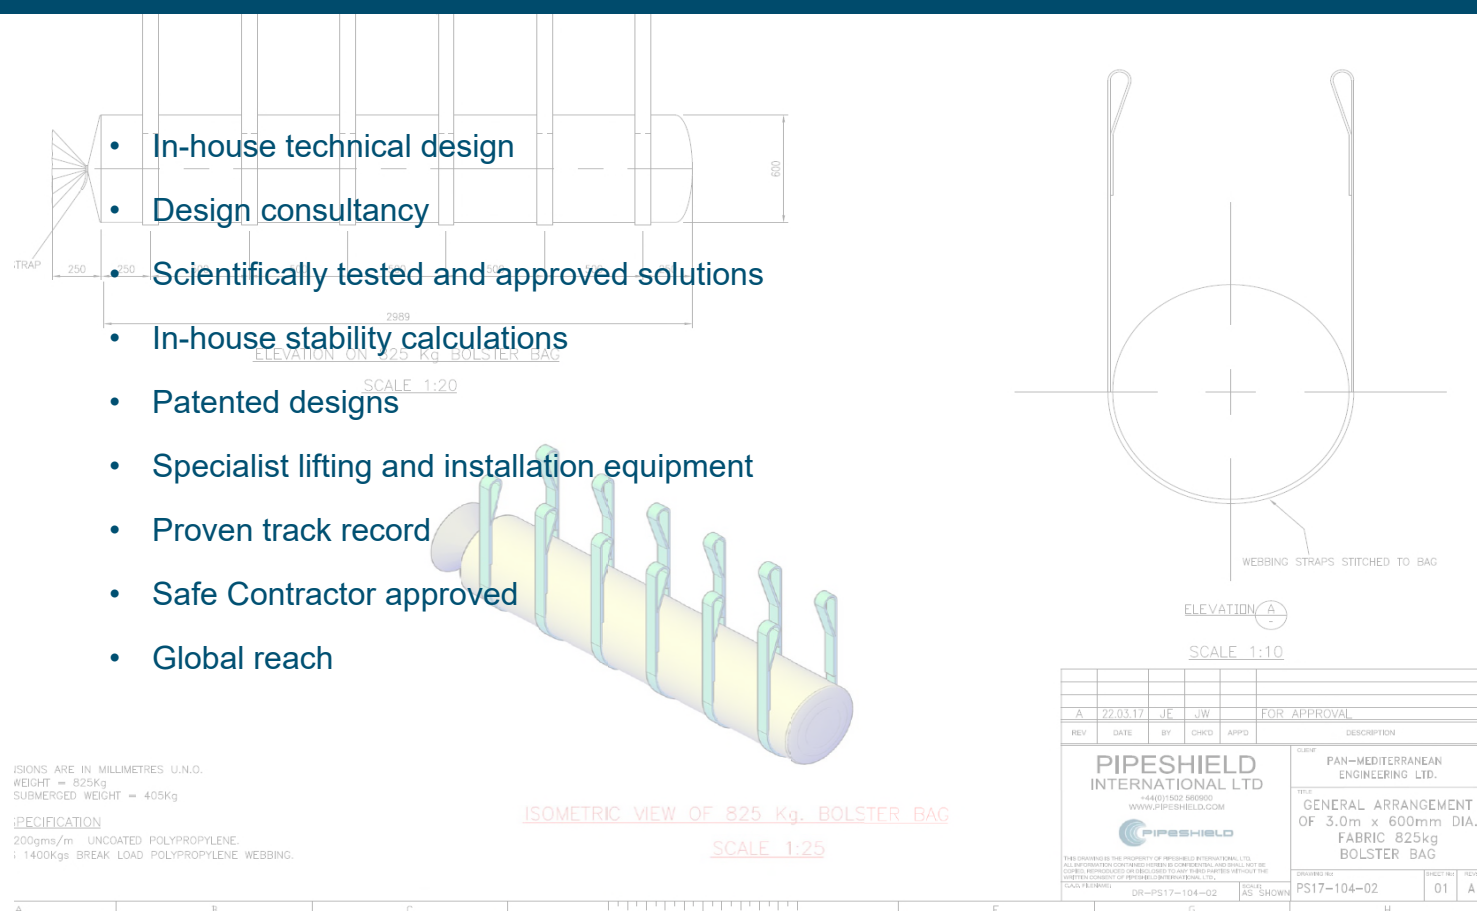

Concrete mattresses manufactured in situ prior to installation

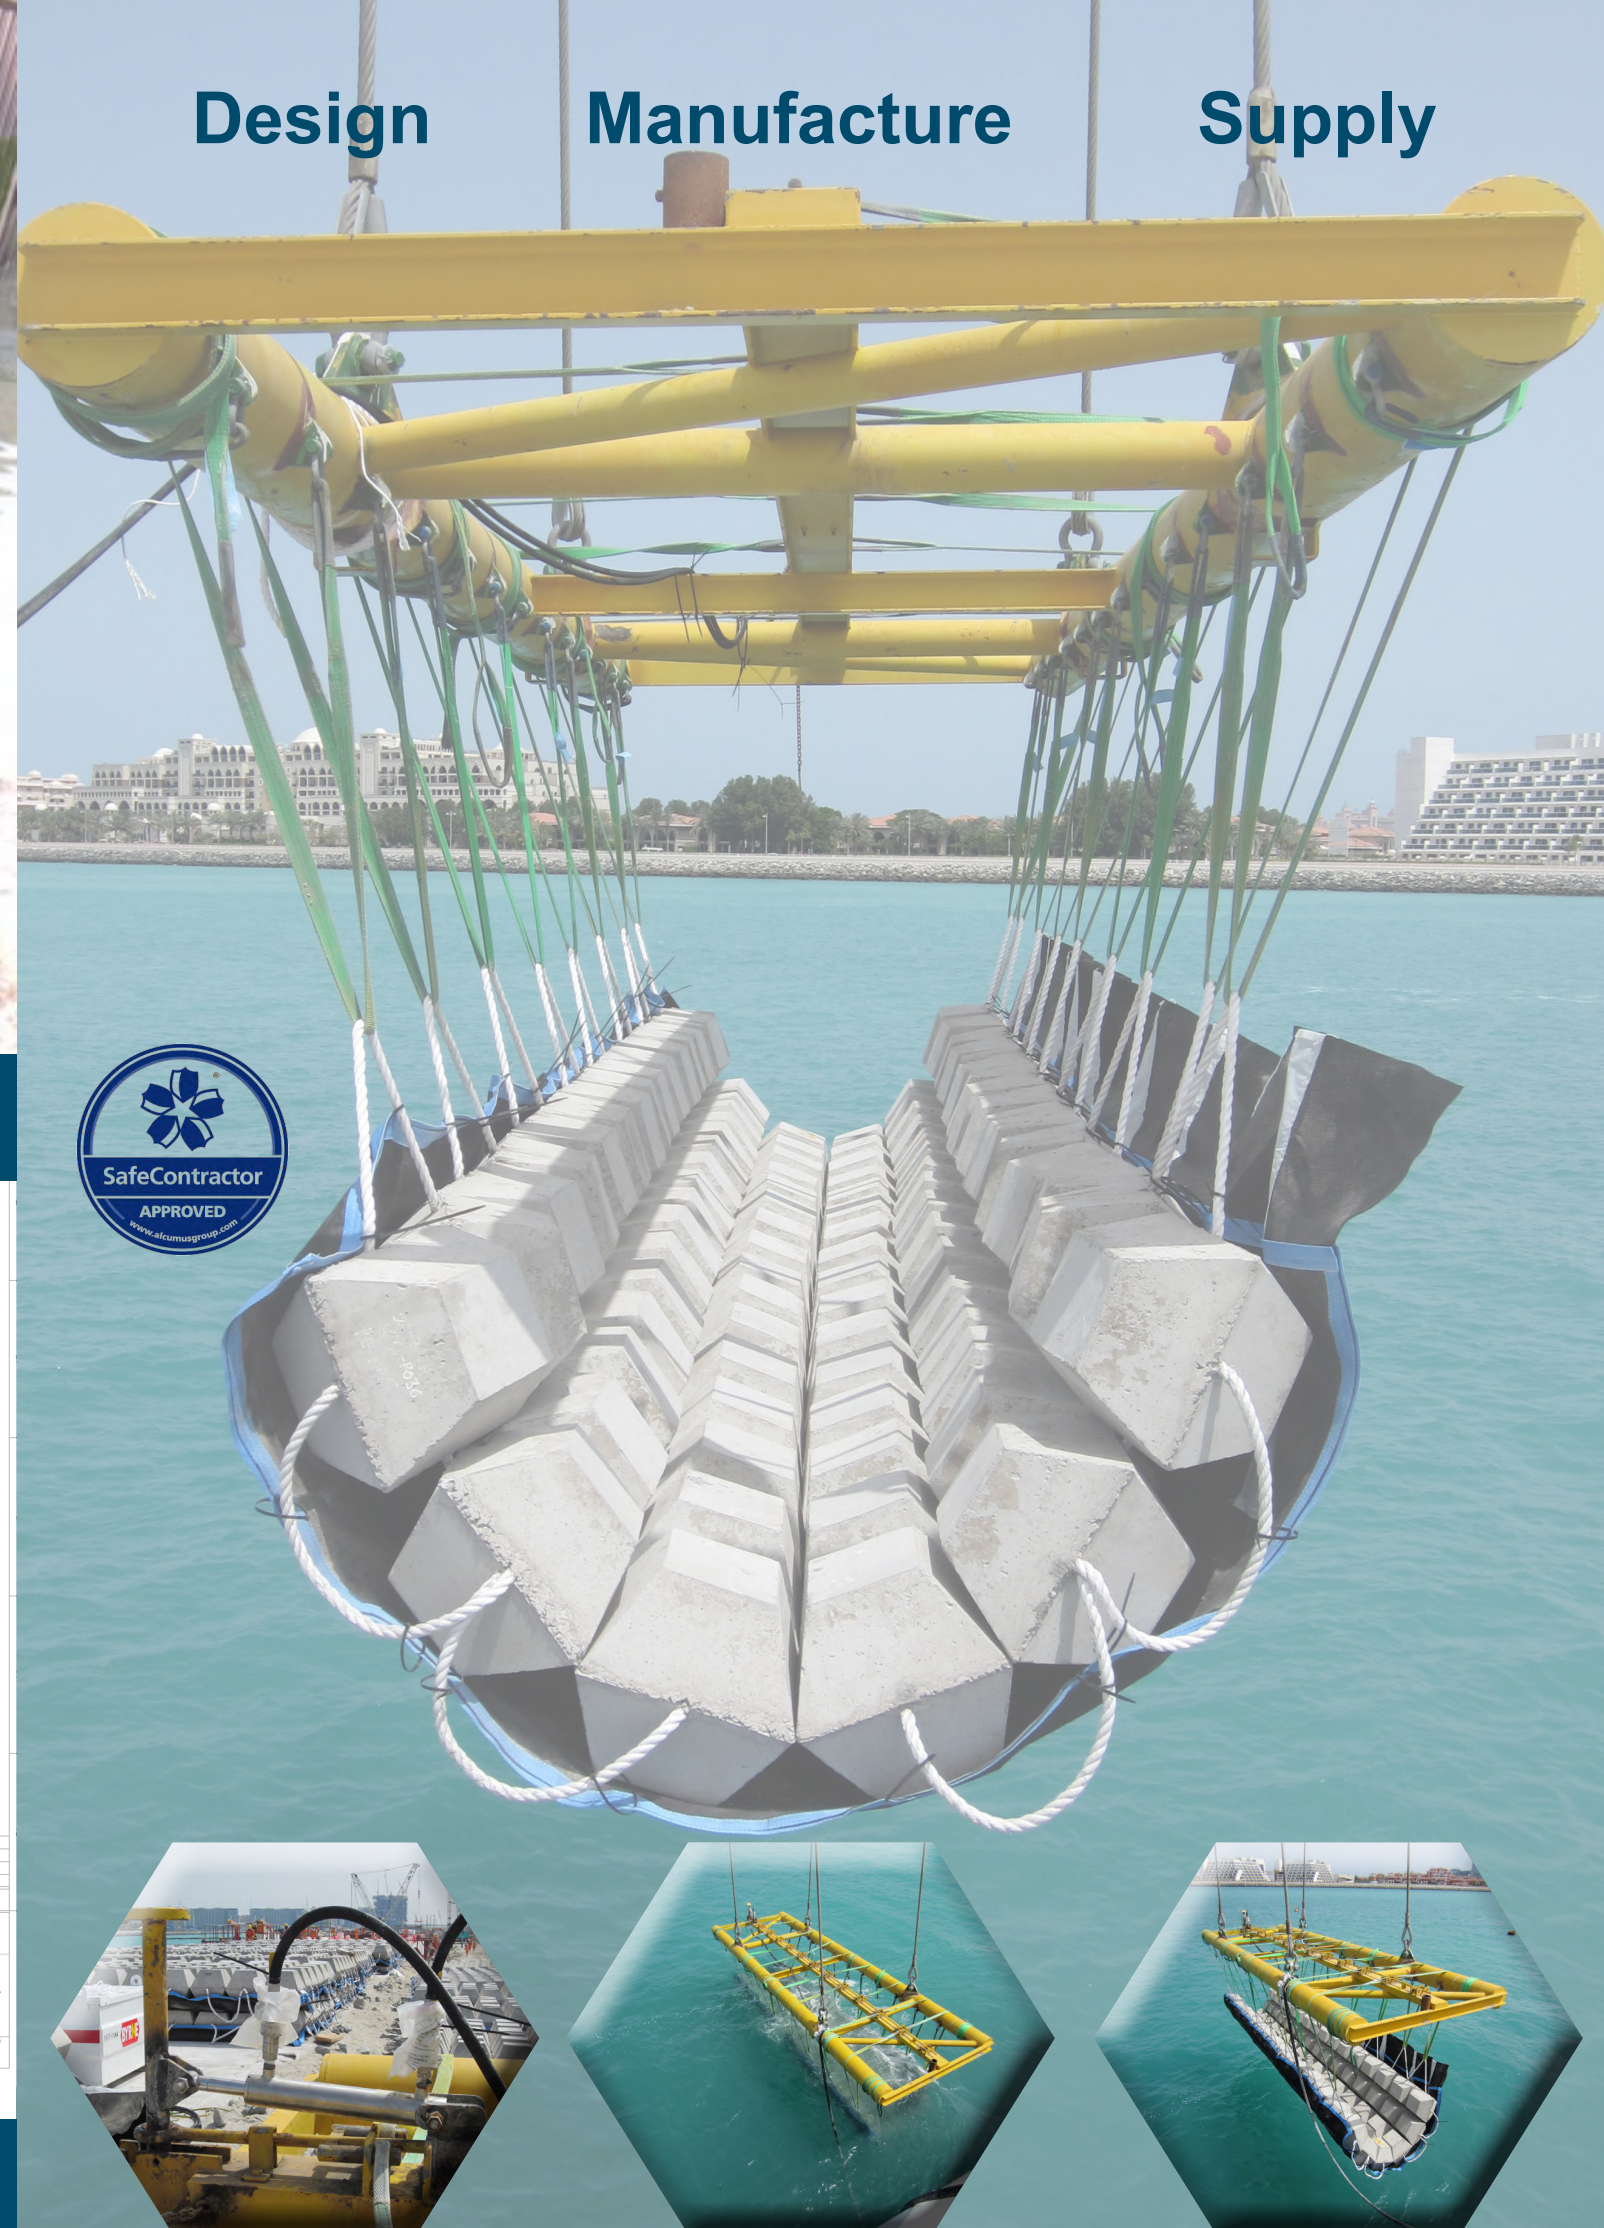

Concrete mattresses pre-fitted with GEO-MAT geotextile mattress

Precise Rock Placement Units (PRP Units)

Comprehensive In-House Technical Design Capabilities

Complete solutions provided by

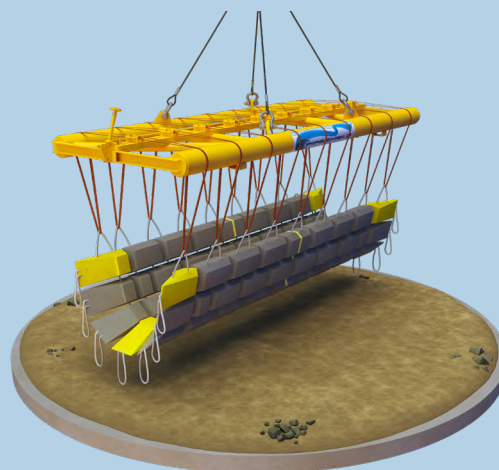

Pipeshield International are a multi-award winning UK company and Global leaders in subsea cable & pipeline protection, stabilisation and anti-scour solutions.

Established in 1999, Pipeshield work to the latest ISO standards and Safe Contractor accredited.

Pipeshield International Trading LLC is our Middle East based trading arm of our organisation and is based in Abu Dhabi.

The company has the capability to manufacture across 5 continents, specialising in Oil & Gas, Renewables & Marine Civils.
