## Notes

- <sup>1</sup> Figures are stated net of movements associated with the ALN share of the reference portfolio.
- <sup>2</sup> Ratio of net available cash, portfolio value and undrawn credit facility to outstanding commitments. Outstanding commitments relating to funds outside their investment period (>13 years old) were excluded from the calculation as there is a low likelihood of these being drawn. This amounted to £38.2m as at 31 October 2025.
- <sup>3</sup> Based on the change in NAV per share and ordinary share price over the period.
- <sup>4</sup> Valuation movement includes the mark-to-market fair value adjustment of 4.9% of PIN's portfolio, which is for listed company holdings.
- <sup>5</sup> Includes operating expenses, financing costs and withholding taxes on investment distributions.
- <sup>6</sup> PIN's valuation policy for private equity funds is based on the latest valuations reported by the managers of the funds in which PIN has holdings. In the case of PIN's valuation as at 31 October 2025, 96% of reported valuations are dated 30 June 2025 or later. Where receipt of post completion valuation reports is pending, any new secondaries or co-investments are held at cost. The NAV Fund Reporting Date Analysis at 31 October 2025 shows the respective reporting dates on which the valuation was based. Full details of PIN's valuation policy can be found in the Notes to the Financial Statements section of PIN's 2025 Annual Report and Accounts.
- <sup>7</sup> Excludes cash flows attributable to the ALN.
- <sup>8</sup> For the purposes of allocating 20% of distributions to the Distribution pool, PIN applied a retroactive effective date of 1 June 2025 for the revised capital policy. As a result, all share buybacks executed in the financial year to date have been deducted from the Distribution Pool.
- <sup>9</sup> Net available cash calculated as cash and net current assets/(liabilities) less undistributed net cashflows associated with the ALN.
- <sup>10</sup> PIN maintains a £400m multi-currency credit facility. The overall credit facility comprises facilities of US\$402.3m and €115.2m and had a sterling equivalent value of £407.3m as at 31 October 2025. As at 31 October 2025, PIN had drawn down £113.4m of the credit facility.
- <sup>11</sup> The Asset Linked Note ("ALN") refers to the unlisted 10-year note issued on 31 October 2017 whose cost and repayments are linked to a reference portfolio consisting of the Company's older vintage funds.
- <sup>12</sup> Available finance calculated as net available cash and undrawn credit facility.
- <sup>13</sup> Net debt calculated as borrowings (excluding the outstanding balance of the Asset Linked Note) less net available cash. The ALN is not considered in the calculation of gross borrowings or the loan-to-value ratio, as defined in PIN's credit facility and loan note agreements. If the ALN is included, net debt to NAV was 10.2% as at 31 October 2025 and 10.1% as at 30 September 2025.
- <sup>14</sup> As at 26 November 2025.
- <sup>15</sup> Based on Net Asset Value.
- <sup>16</sup> The Global category contains funds with no target allocation equal to or exceeding 60% of any particular region.
- <sup>17</sup> Based on valuations as at 30 June 2025 adjusted for known calls and distributions to 31 August 2025. The chart accounts for 100% of PIN's portfolio.
- <sup>18</sup> Vintage profile of investments in private equity funds and direct company investments alongside PIN's underlying private managers. The chart does not reflect the share buybacks conducted during the period.

In addition, most of PIN's investments are in funds whose principal investment focus is outside the UK. Movements in exchange rates between sterling and other currencies therefore affects the value of PIN's investments. Further, the market price of PIN's shares may reflect a discount in the net asset value of PIN's shares, and this discount may increase or reduce due to market factors which are unrelated to PIN's NAV or performance.
